**Construction and assembly of
structures metallic, boiler and piping**

COMPANY CERTIFICATION

ISO 9001 - ISO 45001 - ISO 14001 - ISO 3834 - EN 1090 - Codice Etico D.lgs 231/01

STARTUP

G.&G. Brigante s.r.l. is a startup born from the idea of innovation and vision of the future with the main goal of the two founding partners for a flexible structure capable of growing quickly and revolutionising the industrial market.

The company boasts a background matured by generations in the field of industrial construction and assembly, carpentry, piping, boiler, project management and implementation services.

The organization is driven by a strong entrepreneurial spirit with very important objectives in the sector, offering the synergy of a team of skilled professionals determined to achieve a reality that optimizes the quality/cost ratio with particular attention to the man/power ratio in the respect of **SAFETY AND QUALITY** rules.

The company has an advanced workshop and invests significant resources in order to get modern machines to perform all types of machining in the industry.

The choice of the sector also derives from the strong need to express a young idea that goes hand in hand with the new environmental and innovation policy towards which the industrial sector is heading.

EXPERIENCE OF GENERATIONS

The highly professional staff of the company represents a generational transition as the result of experiences gained in Brigante s.r.l., a company of thirty years in the industry that can boast of a remarkable professionalism, basic certifications in the sector and a prestigious clientele. This combination allows you to continue a historic path to complete construction and assembly of industrial facilities and carry out the following activities:

- Plant maintenance;
- Piping construction and installation;
- Construction and assembly of carpentry;
- Construction and installation of boiler, vessels and pressure equipment, tested according to current rules;
- Tracker construction and agrivoltaic structures;
- Construction and maintenance of shipbuilding.

MISSION

G.&G. Brigante s.r.l mission is to consolidate national leadership by building significant know-how in the renewable energy sector to envisage the future of the energy transition by helping major customers accelerate the conversion of power plants, invest in hybrid plants, with storage and green hydrogen, and invest in the resources of the photovoltaic and wind sector.

Putting sustainability at the heart of corporate culture makes us feel responsible and competitive because investing in the environment means investing in the future.
